### **DETAILED ACTION**

This application is a DIV of 09/447,966, filed 11/23/1999, now US PAT 6,627,616, which claims benefit of 60/121,730, filed 02/26/1999 and of 60/146,564, filed 07/30/1999.

Applicants amendment filed July 6, 2006, has been received and entered. Claims 1-12 have been canceled. Claims 13, 19, 20, 23, 24, 29-31 have been amended. Claims 13-31 are pending.

### ***Election/Restriction***

Applicant's election of Group I and the species of dsRNA in the reply filed on February 7, 2006 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

### ***Priority***

Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged.

Upon consideration of Applicants' arguments and citation of specific support for the claims as amended, Examiner agrees with the claim of priority.

Art Unit: 1632

***Claim Objections***

Claims 13, 15, 16, 23-31 objected to because the elected invention is drawn to a process for delivering an dsRNA that is not expressed is withdrawn.

Amendments to the claims have addressed the basis of the objection.

***Specification***

The specification objected to as failing to provide proper antecedent basis for the claimed subject matter is withdrawn.

Amendments to the claims, and as presented in the Examiner's amendment, have addressed the basis of the objection.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13, 15, 16, 18-20, 23-31 rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention is withdrawn.

The amendment to the claims have addressed the basis of the rejection. Further, it is noted that Applicants' arguments and support for the claims in the instant specification supports the method as claimed.

Art Unit: 1632

***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 13, 15, 16, 18-20, 23-31 rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,627,616 B2 is withdrawn.

The terminal disclaimer filed has been accepted.

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kirk Ekena on September 14, 2006.

The application has been amended as follows:

Cancel claims 14-18.

In claim 19 delete [a nucleic acid sequence comprising] and insert therein "an oligonucleotide of".

In claim 20 delete [nucleic acid sequence comprising] and insert therein "polynucleotide of".

In claim 21 delete [18 wherein the double strand nucleic acid] and insert "13 wherein the non-expressed double strand RNA" therein.

In claim 22 after 'consists of anti-sense' delete [nucleic acid] and insert therein "non-expressed double strand RNA".

Art Unit: 1632

*Reasons for Allowance*

The following is an examiner's statement of reasons for allowance:

The present claims are consistent with claims allowed in U.S. Patent No. 6,627,616 B2, now setting forth specific species of non-expressed double strand RNA to be the nucleic acid to be delivered. The present specification is the first to provide evidence that naked nucleic acid sequences injected into a blood vessel are capable of reaching cells in the extra-vascular space throughout the body.

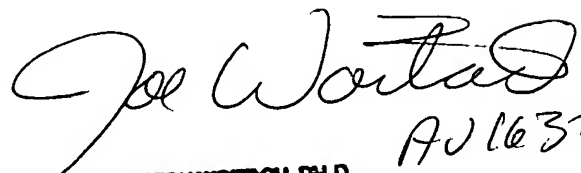

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
